for Application to Inertial Confinement Fusion (ICF), Paris, France (1996)]

Abstract

The mission of NIF is to ignite DT fuel. The relationship between physics of ignition and the NIF's laser power, energy and beam characteristics will be given. The NIF beam requirements needed to meet the mission of Scientific Based Stockpile Stewardship (SBSS) and radiation effects testing will also be discussed.

*Work performed under the auspices of the U.S. Department of Energy by the Lawrence Livermore National Laboratory under contract number W-7405-ENG-48.
